MEGABOARD COLOUR GUIDE

Choose your shower wall panels

55 finishes, from classic white marble to tile effect. Take your time, pick a favourite, and just tell us its number.

- **Big boards, fewer joins**
  Each panel is 2400mm tall and 1000mm wide, so most shower walls need just one or two.
- **Waterproof, no grout**
  A sealed, wipe-clean surface with no grout lines to scrub or go mouldy.
- **Neat, tight joints**
  10mm thick panels with tongue-and-groove edges that lock together.
- **Quick to fit**
  Less mess and less time than tiling, so your bathroom is back in use sooner.

How to use this guide

Every finish has a number, like **No. 14**. When you've found the one you like, call, text or email Martin with the number and we'll do the rest.

Matt Carrara Marble Tile

No. 54
Lunar Stone Hexagon Tile

No. 55
Riven Slate Tile

Good to know

Seeing is believing

Colours in print and on screen can look a little different from the real thing. If you'd like to see a sample before deciding, just ask.

Every board is slightly different

Marble and stone patterns vary from panel to panel, and patterns won't line up exactly across a join. That's part of the natural look.

A few finishes cost a little more

Tile-effect panels and some special finishes can carry a small extra cost. We'll always confirm before ordering.

Found the one you like?

Call or text Martin on **07734 703414**, or email **enquiries@cheshire-bathroom-fitters.co.uk**, with the number of your chosen finish.
